COVID-19: Countries and regions considered to pose a risk of transmission

This page provides a list of countries and regions which are considered by CDNA to pose a risk of transmission to travellers arriving in Australia.

 Page last updated: 10 March 2020

This list is based on the risk of the person having been exposed to COVID-19 due to travel to a country and region with sustained community transmission and/or the other epidemiological evidence.

This list will be updated regularly as the COVID-19 outbreak evolves. This list is based upon the best available evidence at the time of completion.

Higher risk

Country/Region

Mainland China

Iran

Italy

South Korea

Moderate risk

Country/Region

All other countries
